

*Shock Absorbing Snow Plow Blades*

**SNO SHOCK™**

Extend Carbide Blade Life  
up to **2X** or More!

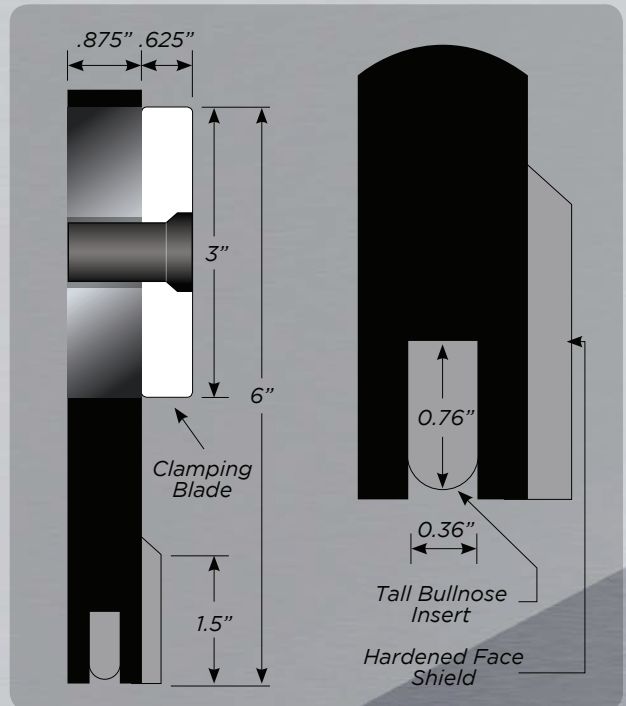

- Cushioned Mount Absorbs Shock & Impact
- Shock Absorber Eliminates Carbide Fracturing
- Extra Large Tungsten Carbide Inserts Extend Life
- Hardened Face Shield Eliminates Premature Wear

Black Cat **SnoShock** Plow Blades are just that, snow plow blades with built in shock absorbers!

Replacing the normal mounting holes in the steel blade with specially designed poly bushings allows the blade to move and float under the weight of the plow. This cushioning effect absorbs the shock and impact normally transmitted through the blade and virtually eliminates carbide insert fracturing. The result is dramatically longer blade life. An integrated "Shield" is designed into the face of the blade to further protect the carbide inserts and keep the steel "holder" blade from prematurely wearing. A hardened steel clamping blade is used over the face of the **SnoShock** to mount the assembly to the plow.

Black Cat **SnoShock** Plow Blades are currently available in 7/8" x 6" profile and come standard with Black Cat "Tall Bullnose" inserts, offering the user exceptional blade life. Other insert shapes and sizes can be ordered. Configurations are available for plows with 5/8" or 3/4" holes on 12" or 8" hole spacing.
